

NEWS RELEASE

Nemo Motherboard available for immediate purchase

PA6T 1682M 1.8Ghz Ghz 64-bit dual-core PowerPC CPU

Cardiff 2013, 21st October 2013

A-EON Technology is pleased to announce that the Nemo motherboard is now available for immediate purchase for Amiga enthusiasts and system builders.

The Nemo motherboard is at the heart of A-EON Technology's AmigaONE X1000 system, the most powerful Next-Generation computer, custom designed to specifically run the latest version of the Amiga Operating system (AmigaOS 4.1). Built around the unique PA Semi PA6T 1682M, a 64-bit dual core PowerPC CPU, the Nemo motherboard also supports over twelve Linux PowerPC distributions including the a specially configured Live Ubuntu Remix 12.04 LTS DVD. Following the original Commodore tradition Nemo includes a B52 song title, "Keep this party going" and the names of the original board designers. A few hidden "Easter eggs" are also included. Fully built AmigaONE X1000 systems are also available for immediate purchase from AmigaKit and Alinea Computer in Germany.

To order your Nemo motherboard please visit:
